

THE CAMPUS SPACES

The campus is conveniently nestled in a thriving neighborhood on nearly 3 acres with multiple buildings and green space that flow seamlessly between indoor and outdoor gathering places. There are five buildings already in use by 10 organizations, and programs will continue during construction.

- The **main building** is the central Hub with offices for more than 15 Jewish organizations, flexible lounge spaces for coworking and connecting, a café, classrooms for adult education, a library for all ages, and our new preschool.
- The **120-child preschool** has six state-of-the-art classrooms with gardens to extend the learning environment to the outdoors, and a pilot Spanish-language immersion program.
- The **event center** features 15,000+ sq ft of flexible indoor/outdoor space to host health and wellness activities, arts and culture events, holiday celebrations, and community gatherings.
- There is a **central courtyard** connecting the buildings, and throughout the campus are green spaces that include a playground for young children, an athletic court, multiple recreational and meditative areas, a learning garden for all ages, and space for outdoor performances.
- **Additional buildings** host a teen center for the entire community, multiple artists-in-residence, residential homes for young professionals, and a unique maker's space.
